COMMUNICATIONS SECTION  
MAY 14 2008

**Examiner's Statement of Reason for Allowance**

1. Claims 1-3, 8-11 and 16 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record teaches various microphone circuits thereon, for example U.S. patent number 6,654,468. However, the prior art of record fails to show claim 1, a method for reciprocal adaptation of a plurality of microphones of a hearing device, comprising the steps of: reducing said difference by filtering said first output signal dependent on said first amplitude and on said second amplitude in a filter by multiplying filtering said first output signal with a transfer function of said filter having a numerator polynomial and denominator polynomial, and in a feedback regulation loop containing said filter, varying only said numerator polynomial in said feedback regulation loop to equalize said first and second amplitudes and combined with all the limitation of claim 1; and claim 9, a hearing device comprising: a filter and a feedback regulation loop containing said filter that reduce said difference by filtering said first output signal dependent on said first amplitude and on said second amplitude by multiplying said first output signal with a transfer function of said filter having a numerator polynomial and a denominator polynomial and, in said feedback regulator loop, varying only said numerator polynomial and combined with all the limitation of claim 9.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
